Ideation Phase
Define the Problem Statements

Date	01 October 2026
Team ID	SWTID-2026-6297
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	A service desk agent / caller who raises Incident records in ServiceNow every day
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	Submit a complete and correct Incident quickly so it is routed and resolved without delay
but	Describe what problems or barriers stand in the way – what bothers them most?	The form shows every field and I only learn about missing or invalid data after I submit
because	Enter the "root cause" of why the problem or barrier exists – what needs to be solved?	No UI Policy or Client Script guides field behavior or validates data before the record is saved
which makes me feel	Describe the emotions from the customer's point of view – how does it impact them emotionally?	Frustrated and unsure what information is required to submit a valid Incident

Example:

Problem Statement (PS)	I am (Customer)	I’m trying to	But	Because	Which makes me feel
PS-1	Caller / Service Desk Agent	create an Incident quickly with the right details	the form shows every field and I learn about missing data only after submitting	there is no guidance or conditional behavior on the form	frustrated and unsure what information is required
PS-2	Resolver / Fulfiller Group	triage, route and resolve Incidents efficiently	records arrive incomplete, inconsistently categorized or without resolution notes	data entry depends on manual checks and user awareness	slowed down and forced to chase missing information
PS-3	Process Owner / ServiceNow Admin	ensure accurate reporting and SLA compliance	invalid or incomplete data still gets submitted	business rules are not enforced at the point of entry	concerned about data quality and service-level risk
