Functional & Performance Testing Template

Model Performance Test

Date	01 October 2026	**Team ID**	SWTID-2026-6297
Project Name	Implement Client Script & UI Policy (Incident)	**Maximum Marks**	5 Marks
Team Leader	Anirudh	**Team Size**	3 Members
Team Members	Shyam Sundar, Mohan Raj	**Module / Table**	Incident Management [incident]

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Resolution Notes Text Length Validation	1. Set State to 'Resolved'. 2. Enter close_notes < 20 chars (e.g., 'fixed'). 3. Click Save/Submit.	Form submission blocked; error banner prompts for >= 20 characters.	Submission successfully blocked; clear field message displayed under close_notes.	**Pass**
FT-02	Opened Date Temporal Range Validation	1. Select future date in 'Opened' field. 2. Trigger onChange event. 3. Select valid past/current timestamp.	Future date triggers error message and clears field; current/past timestamp accepted.	Future date rejected with g_form error message; valid past/current timestamp saved.	**Pass**
FT-03	Dynamic VIP Caller Highlighting & Alert	1. Select a VIP user in 'Caller' lookup. 2. Observe form banner and visual styling. 3. Change to standard caller.	VIP caller triggers visual color highlight and alert message; non-VIP clears highlight.	Caller field highlighted with visual background flash; info message rendered immediately.	**Pass**
FT-04	UI Policy Resolution & Lockdown Rules	1. Set State to 'Resolved' -> check Close Code/Notes. 2. Set State to 'Closed' -> inspect core fields.	On Resolved, close fields become mandatory & visible; on Closed, form is read-only.	Resolution fields enforce mandatory entry; core fields completely locked to read-only.	**Pass**
PT-01	Client Script Response Time Test	Measure browser execution time of onLoad and onChange scripts using Client Performance Profiler.	Script execution latency should be well under 1000ms (threshold < 300ms).	Average onLoad execution clocked at 120ms; onChange scripts completed in 85ms.	**Pass**
PT-02	Asynchronous GlideAjax Speed Test	Simulate multiple concurrent user lookup calls (VIP, user department, active ticket count).	Server response should return smoothly without freezing form UI thread.	Non-blocking asynchronous callbacks returned within 95ms; zero UI thread stutter.	**Pass**
PT-03	Bulk Incident Update & Attachment Test	1. Attach multiple log files (PDF/TXT) to Incident. 2. Save record with UI Policies active.	Attachment upload and form state policies execute without crash or data loss.	All attachments uploaded intact; UI policies evaluated and enforced without delay.	**Pass**
