Project Development Phase

Performance Test

Date	01 October 2026	**Team ID**	SWTID-2026-6297
Project Name	Implement Client Script & UI Policy (Incident)	**Maximum Marks**	5 Marks
Team Leader	Anirudh	**Team Size**	3 Members
Team Members	Shyam Sundar, Mohan Raj	**Tool / Analytics Platform**	ServiceNow Incident [incident] & Tableau Desktop

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	**Data Rendered**	**Incident Management Dataset Ingested into Tableau:** • **Connection Mode:** Live Web Data Connector / Tableau Extract (.hyper) linked to ServiceNow incident table. • **Total Records Rendered:** 1,855 incident rows. • **Key Dimensions & Measures Rendered:** Incident Number, Priority (P1 to P4), State (New, In Progress, On Hold, Resolved, Closed), Caller ID, VIP Status (Boolean), Category, Subcategory, Assignment Group, Opened At, Resolved At, Closed At, Resolution Notes Length, and Policy Execution Triggered.
2.	**Data Preprocessing**	**Data Preprocessing & Cleaning Steps:** • **Schema Cleansing:** Converted sys_id to unique String dimension; parsed opened_at and resolved_at into clean Date/Time hierarchies (Year, Quarter, Month, Day). • **Handling Nulls & Blanks:** Filtered out inactive draft tickets; grouped empty subcategories into 'General Incident Support'. • **Data Reshaping:** Created pivoting logic on state progression timestamps to measure duration between New $\rightarrow$ In Progress $\rightarrow$ Resolved.
3.	**Utilization of Filters**	**Interactive Tableau Filters Configured:** • **Global Dashboard Filter:** Filter on Incident State applied to all related worksheets. • **Priority Quick Filter:** Single-value & multi-value selection for P1-Critical through P4-Low. • **VIP Caller Boolean Filter:** Context filter isolating high-priority VIP ticket trends. • **Relative Date Range Filter:** Interactive timeline slider filtering incidents over rolling 30/90/180-day periods.
4.	**Calculation Fields Used**	**Tableau Calculated Fields Implemented:** • **Resolution Duration (Hours):** DATEDIFF('minute', [Opened At], [Resolved At]) / 60.0 • **Policy Compliance Flag:** IF [State] = 'Resolved' AND LEN([Close Notes]) >= 20 THEN 'Compliant' ELSE 'Non-Compliant' END • **VIP Resolution Status:** IF [VIP Status] = TRUE THEN 'VIP Expedited' ELSE 'Standard Track' END • **SLA Breach Identifier:** IF [Resolution Duration (Hours)] > [Target SLA Hours] THEN 'Breached' ELSE 'Within SLA' END
5.	**Dashboard Design** **No of Visualizations / Graphs: 4**	   

6.	**Story Design** **No of Visualizations / Graphs: 3** **Story Points**
