User Acceptance Testing (UAT) Template

Project Functional Specification Document (FSD) Validation

Date	01 October 2026	**Team ID**	SWTID-2026-6297
Project Name	Implement Client Script & UI Policy (Incident)	**Maximum Marks**	5 Marks
Team Leader	Anirudh	**Team Size**	3 Members
Team Members	Shyam Sundar, Mohan Raj	**Module / Table**	Incident Management [incident]

Project Overview:

Project Name: Implement Client Script & UI Policy (Incident)
Project Description: Optimization and governance of ServiceNow Incident Management forms using dynamic Client Scripts (onLoad, onChange, onSubmit) and UI Policies. Enforces field integrity, VIP caller recognition, resolution requirements, and closed-state lockdowns.
Project Version: v2.4-Production Release | **Testing Period:** 01 October 2026 to 06 October 2026

Testing Scope & Environment:

Testing Scope: Incident form temporal validations, VIP caller visual alert flashes, P1 major incident confirmations, mandatory resolution fields upon state change to Resolved, character length validation (>= 20 chars), category/subcategory dynamic filtering, and read-only lockdown on state = Closed.
Testing Environment: ServiceNow Developer Instance (Vancouver/Washington DC Patch release)
URL / Location: https://dev-instance.service-now.com/incident.do | **Credentials:** admin / itil_tester_demo

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/ Fail
TC-001	Opened Date Future Restriction	1. Open Incident form. 2. Set 'Opened' to future date. 3. Tab out / onChange.	Future date rejected; error message displayed; field cleared.	Field cleared automatically with error: 'Opened date cannot be in future.'	**Pass**
TC-002	VIP Caller Visual Alert Flash	1. Select VIP user in 'Caller'. 2. Observe UI banner & field. 3. Switch to non-VIP caller.	VIP badge shown, field flashes red/amber, info banner displayed.	Caller field flashed with highlight; VIP alert displayed instantly.	**Pass**
TC-003	Critical P1 Confirmation Dialog	1. Set Priority to '1 - Critical'. 2. Click Save/Submit. 3. Accept prompt.	Browser confirmation prompt displayed regarding MIM escalation.	Confirmation dialog triggered before form submission accepted.	**Pass**
TC-004	Resolution Notes Length Validation	1. Set State = 'Resolved'. 2. Enter close_notes < 20 chars. 3. Click Save.	Submission blocked; error prompts user for minimum 20 characters.	Form blocked; field error shown: 'Resolution Notes must be >= 20 chars.'	**Pass**
TC-005	Mandatory Close Fields on Resolved	1. Move State to 'Resolved'. 2. Inspect Close Code & Close Notes. 3. Leave blank.	UI Policy makes both fields visible and mandatory with red asterisk.	Close code and close notes dynamically set to mandatory and visible.	**Pass**
TC-006	Closed Incident Read-Only Lockdown	1. Set State to 'Closed'. 2. Submit ticket. 3. Attempt field edits.	All core fields (Caller, Priority, Description) become Read-Only.	All form inputs successfully locked to read-only; editing prevented.	**Pass**

Bug Tracking:

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	VIP Caller flash persistent when switching to standard caller	1. Select VIP caller. 2. Switch to standard caller. 3. Note highlight color.	Medium	**Closed**	Fixed by clearing background style in onChange else-block.
BG-002	Close notes character length alert firing on draft 'New' tickets	1. Create New Incident. 2. Leave notes blank. 3. Save in 'New' state.	High	**Closed**	Added state conditional check (state == 6 || state == 7) before evaluating length.

Sign-off & Approval:

Tester Name: Abinaya S (Lead QA) | **Project Lead:** Aafrin Mufina S | **Date:** 01 October 2026 | **Signature:** *Aafrin Mufina S / Approved for Deployment*
Notes: All test scenarios covered positive and negative validation checks across Client Scripts and UI Policies. Zero open critical bugs remaining. Full sign-off attained from QA lead and Project Manager.
